Big River's market diversity will support continued growth

Strong residential builder orderbook and project pipelines expected to continue into FY24.

Civil construction pipeline very strong.

A&A expected to be soft but this will be offset by growing Commercial and Multi Residential construction.

- Project delays due to labour constraints continue to extend the pipeline.
- Market will be further buoyed by migration returning back to pre-pandemic levels and overseas students returning.

- Product cost increases of the past few years have largely stabilised as supply chains have improved.

Strategy & Financial

Strong pipeline of acquisition opportunities being considered across Panels, Construction.

We are on track to continue to deliver further acquisitions in next six months as per the strategy.

- Our Grafton Consolidation project, behind schedule due to equipment delays, is almost complete and expected to deliver synergies later in FY23.
- January trading above previous year despite many builders taking extended holidays.
- Improvements in run rate in late January and February are expected to continue as major projects start to be delivered.
- 2H23 is expected to be in line with consensus forecast.
